

Gaede Price awarded to Selina Olthof

Dr. Selina Olthof was awarded by the German Physics Society with the Gaede Price.

Köln, November 15, 2018 – Dr. Selina Olthof will be awarded the “Gaede Price” of the German Physics Society for her outstanding research in the field of photoelectron spectroscopy. She investigates novel semiconducting materials, organics as well as hybrid perovskites, focusing on the influence the energy level alignment at internal interfaces might have on the performance of optoelectronic devices. The award ceremony will take place at the DPG annual meeting in Regensburg on April 2, 2019.

After her PhD at the TU Dresden and a postdoc stay at Princeton University, Selina Olthof joined the group of Prof. Meerholz at the Chemistry Department at the University of Cologne in 2012, where she currently holds a position as Junior Group Leader.
